SPEAK MY LANGUAGE

As an economic development agency that specializes in small business and entrepreneur training, your advisors are perfectly positioned to incorporate cybersecurity into business planning.

Small business needs cyber trained people that speak their language.

**CYBER
WYOMING** 

**A high touch, effective
program using business
language that changes
security behaviors and helps
the client strategically plan
for their future digital world.**

**On-the-job training &
certification to meet cyber
planning assistance
requirements.
LEARN then DO
It's more than a boot camp!**

**Add cyber to your
advising services.

Training for Business Advisors to Provide Cyber Planning Assistance

Step 1 Is Your Organization the Right Fit?

We want you to be successful, so if your turnover rate is low and you have business advisors interested in helping your business community then this is the program for you!

Who Makes the Best Cybersecurity Business Counselors?

Non-technical, detail oriented people with project management and strategic planning experience.
Able to dedicate about 5 hours per week for on-the-job, learn then do, training.

Step 2 Apply

Fill out the application and return it to CyberWyoming with the fee (\$500). If not accepted, your fee is nonrefundable but you may submit the application again with no additional fee. Contact info@cyberwyoming.org to request the application and program details, including pricing.

Step 3 Application Acceptance, Licensing, & Training

Discuss the program license agreement with CyberWyoming, then review and sign.

Designate the staff members committed to be Cybersecurity Business Counselors, access the online learning portal, and train with CyberWyoming.

Thanks to the Gula Tech Foundation!

Due to the Gula Tech Foundation Grant awarded to CyberWyoming, the first 4 economic development agencies accepted will receive training and licensing discounts as well as pay-to-learn opportunities.
